

# COWPEAS

## DR SAUNDERS

### OVERVIEW

DR SAUNDERS is a sub-tropical/ tropical legume that can be described as an upright type Cowpea with medium to fine stems. Its leaves comprise of three hairless leaflets; triangular to egg-shaped that are approximately 10cm x 7-8 cm. There are approximately 8000-15000 seeds per kg.

DR SAUNDERS tolerates drought and hot conditions as well as being a highly palatable hay crop.

SEED/HA	15-20Kg
DAYS TO FLOWERING	55-60
DAYS TO HARVESTING	120
SEED COLOUR	Reddish Brown
GROWTH HABIT	Semi-Upright

- Tolerates drought and heat
- Highly palatable
- Digestibility 56-65%
