

# ERAGROSTIS TEFF

## SA BROWN

### OVERVIEW

---

A summer annual, maturing quickly in 10 – 12 weeks SA brown grows under a wide range of conditions

It is an annual grass used mainly for hay. It is normally established in the summer months. Being shallow rooted and small seeded, a fine firm seedbed is essential for establishment.

- Seeding Rate; 15kg/ha
- Roll for better germination results
