

WHITE CLOVER

HAIFA

WINTER ACTIVE

Haifa is a highly productive winter active variety suited to rotational grazing systems in higher rainfall areas.

As with all white clovers it is important to ensure that seed is not sown too deep and that pastures are frequently grazed to ensure light penetration to enhance plant establishment and development. White clover is generally not competitive with annual ryegrass species.

Sowing rate: 3–4kg/ha

- Highly productive in winter
- Suited to higher rainfall areas
- Ensure that seeds are not sown too deep
- Ensure frequent grazing
