# MAIZE

## YELLOW HYBRID MAIZE

VARIETY	PACK SIZE	SOWING RATE kg/ha	PLANTING
CAP 122-60	80,000 Seeds	Ask your sales representative about sowing rate for your specific area.	Oct - Dec
CAP 9444 NG	80,000 Seeds		Oct - Dec
CAP 90-06 Q	80,000 Seeds		Oct - Dec
CAP 95-22	80,000 Seeds		Oct - Dec
CAP 96-46	80,000 Seeds		Oct - Dec

### CAP 122-60

This is a highly prolific variety with long cylindrical cobs. This variety can be grown at a population of 80 000 plants per hectare under optimum conditions. It responds well to fertilizer and irrigation, tolerant to Helminthosporium blight, tolerant to Stalk rot, susceptible to Grey leaf spot and Rust. It has a yield potential of up to 15 MT/ha.

VARIETY	PACK SIZE	SOWING RATE kg/ha	PLANTING
CAP 92-62 RR	80,000 Seeds	10-25	Oct - Dec
CAP 92-42 RRBT	80,000 Seeds	10-25	Oct - Dec

## YELLOW OPEN POLLINATED MAIZE

VARIETY	PACK SIZE	SOWING RATE kg/ha	PLANTING
Sahara	25kg	Ask your sales representative about sowing rate for your specific area.	Oct - Dec
Okavango Dent (PBR)	25kg		Oct - Dec

## WHITE OPEN POLLINATED MAIZE

VARIETY	PACK SIZE	SOWING RATE kg/ha	PLANTING
ISILO	25kg	Ask your sales representative about sowing rate for your specific area.	Oct - Dec
Shesha	25kg		Oct - Dec
Nelson's Choice (PBR)	25kg		Oct - Dec
ZM 1523	25kg		Oct - Dec
Matuba Select (PBR)	25kg		Oct - Dec
Inkunzi	25kg		Oct - Dec
Kalahari Early Pearl	25kg		Oct - Dec

### CAP 90-21

This is a HIGH YIELDING hybrid which performs well in high potential regions. This hybrid has done well as a silage variety. It has been noted to have grain yields of over 10mt/ha as the norm. Silage yield potential of between 75-80mt/ha under ideal conditions.

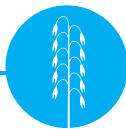

## WHITE HYBRID MAIZE

VARIETY	PACK SIZE	SOWING RATE kg/ha	PLANTING
CAP 92-99	80,000 Seeds	Ask your sales representative about sowing rate for your specific area.	Oct - Dec

## SUMMER

### DRY BEANS

VARIETY	PACK SIZE	SOWING RATE kg/ha	PLANTING
Jugo	25kg	65-100	Oct - mid Jan
CAP 2000 (PBR)	25kg	65-100	Oct - mid Jan
CAP 2001 (PBR)	25kg	65-100	Oct - mid Jan

#### CAP 2001

This speckled sugar bean has a bush type growth habit. Its growing season is approximately 90 days and is moderately resistant to rust.

### GROUNDNUT

VARIETY	PACK SIZE	SOWING RATE kg/ha	PLANTING
Akwa	25kg	75-100	Oct - Dec
Kwarts	25kg	75-100	Oct - Dec
Anel	25kg	75-100	Oct - Dec
Sellie Plus	25kg	75-100	Oct - Dec
Tufa	25kg	75-100	Oct - Dec

### HYBRID GRAIN SORGHUM

VARIETY	PACK SIZE	SOWING RATE kg/ha	PLANTING
CAP 1002 (RED)	25kg	5-10	Oct - Dec
CAP 1003 (RED)	25kg	5-10	Oct - Dec
CAP 1004 (WHITE)	25kg	5-10	Oct - Dec
CAP 1005 (RED)	25kg	5-10	Oct - Dec
Arrow (SWEET RED)	25kg	5-10	Oct - Dec
NS 5511 (RED)	25kg	5-10	Oct - Dec
NS 5655 (RED)	25kg	5-10	Oct - Dec

### OPEN POLLINATED GRAIN SORGHUM

VARIETY	PACK SIZE	SOWING RATE kg/ha	PLANTING
Macia (WHITE)	25kg	5-10	Oct - Dec
NS5751	25kg	5-10	Oct - Dec

### HYBRID SUNFLOWER

VARIETY	PACK SIZE	SOWING RATE kg/ha	PLANTING
CAP 4000	150 000 seeds	3-5	Oct - Jan
CAP 4064	150 000 seeds	3-5	Oct - Jan
CAP 4065	150 000 seeds	3-5	Oct - Jan

### CAP 2000

This speckled sugar bean has a growth habit that is indeterminate. There are a few short and upright branches that grow after flowering. It has a growing season of approximately 100 days with a good resistance to shattering.

## SOYA BEANS

Captain (PBR)	25kg	25-35	Feb - May
Passerel Plus (PBR)	25kg	25-35	Feb - May
Passerel Plus ER7	25kg	25-35	Feb - May
Spicer	25kg	25-35	Feb - May

#### Westerwold Ryegrass (*Lolium multiflorum*)

Is an annual type that is very fast growing and quick to establish. Unlike Italian ryegrass, it forms stems during the sowing year. Westerwold produces high levels of hay or silage when cut within three to six months of sowing. Differences between diploid and tetraploid varieties are small.

#### Festulolium

Is a cross between *Festuca* (meadow fescue/ tall fescue) and *Lolium* (Italian ryegrass/ perennial ryegrass). Festulolium combines high quality with good winter hardiness, persistence and stress tolerance. As a result of a strategic partnership with DLF, Capstone has a range of types similar to tall fescue and ryegrass, all with improved characteristics derived from the parent crossings. These varieties provide for extended growth of high-quality grass in cold regions

BREEDING FOR  
CLIMATE CHANGE,  
THE ENVIRONMENT  
AND THE FARMER

# ANNUAL WINTER PASTURES

## ITALIAN RYEGRASS

# BIG FIVE MIX

SEED
Perennial Ryegrass 24Seven / Bowie
Fescue Bariane
Fescue Felina
Cocksfoot Donata
Brome Matua
Additional seed options available

# Where we are

## Who we are

The personnel of Capstone Seeds S.A. have been involved in the Seed and Agricultural Industry for more than twenty five years. Capstone has experienced staff who manage production, research and marketing of seed and have established a network within South Africa and beyond its borders.

The sales and administrative offices in Howick, of Capstone Seeds S.A., are strategically situated 120kms from Durban. Howick is a small town in the KwaZulu-Natal Midlands that is adjacent to the N3, a major arterial route to Johannesburg and the interior. Capstone Seeds' main warehouse and factory in Harrismith, is on the same route, which is conveniently located for our producers and growers alike. In addition we have a Research Laboratory, as well as a depot down in the Cape.

Capstone Seeds S.A. handles an extensive range of seed from pasture and forage seed to hybrid maize and sunflower seed - these seeds are adapted to a wide range of conditions. Capstone also handles varieties that have been bred by Agricultural Research Council (ARC), Nelson Genetics' Dr Sydney Nelson, and others. The Company processes a wide range of seed for agricultural purposes, sourced from registered growers countrywide. Seed, produced in Africa, North and South America, Australia and New Zealand, is imported and exported to over 30 countries worldwide.

Each consignment of seed received at our factory is processed and tested internally in our in-house laboratory, as well as externally to ensure the seed complies with the buyer / importing countries requirements. The seed is then packaged and distributed.
