

PERENNIAL RYEGRASS

TUGELA (DIPLOID)

OVERVIEW

Bred out of the DLF NZ Breeding program:

- Same breeding program as 24Seven
- Bred for persistence, dense (robust) tufts and strong summer production

Fine leaf = ↑ Tillers per tuft = ↑ **Tillers/ha**

↑ Tillers/ha = ↑ roots per hectare =
↑ stress/heat resistance = ↑ **Persistence**

↑ Roots per hectare = ↑ Carbon captured =
↑ **Farm sustainability**

Perfectly suited as a base of a pasture mixture

- Diploid perennial ryegrass
- Late flowering date (+24 days after Nui)
- Strong early season production

Perennial ryegrass @ DLF George Nov 2021
